

Polar ICE PROFESSIONAL DEVELOPMENT for Polar Scientists

WORKSHOP PURPOSE — WHY SHOULD I ATTEND?

Scientists are increasingly being asked to communicate the “broader impacts” of their work. Polar Interdisciplinary Coordinated Education (ICE) is an interdisciplinary group of educators and scientists working together to share scientific research from the Arctic and Antarctic with educators and students. Our objective is to help scientists communicate their research from the poles beyond their academic peers to the broader community. Please join us for a hands on workshop featuring demonstrations and discussions to address skills that include:

- Connecting with diverse audiences
- Deconstructing/decoding science for non-expert audiences
- The art of telling science stories
- Networking with the education and outreach community

INTERESTED IN PARTICIPATING?

Fill out our application form at <http://tinyurl.com/paoeg4c> to apply for this free program TODAY.

Application deadline is Monday, December 21, 2015

Stipends are available

WHO SHOULD ATTEND?

Scientists studying the Polar Region who want to:

- Learn strategies to communicate more effectively to diverse audiences
- Develop and engage in strong scientist-educator partnerships and professional networks
- Learn and practice communication skills
