

Polar ICE Summit 2019

Help us collect the effective practices of our Polar ICE Community

March 15-16, 2019

At Moss Landing Marine Labs, Monterey, CA

Polar-ICE is hosting a two-day Summit to reflect upon the impact of the program over the last three years, as well as discuss lessons learned from the program activities and document ideas for prolonging impact beyond the life of the grant.

We are bringing together both scientists and teachers from across the Polar-ICE NSF funded project. The Summit will include themed sessions, including:

1. Teaching, Learning, & Communicating with Data
2. Outreach & Communication about Polar Research
3. Building Professional Partnerships through Trainings

Sessions will include 10-minute lightning talks, panel discussion, and round table dialogue. The event will also include networking and an evening Share-A-Thon for participants to share their favorite Polar-ICE activity, lab, lesson plan, student products, etc.

We cordially invite you to attend this exciting Polar-ICE Spring Summit, and submit an abstract to propose a lightning talk on your work with Polar-ICE during one of our sessions.

Travel support (flights or mileage to the event, plus lodging) is available if needed, and registration is free.

Meals will be provided during the event.

Participants are expected to arrive in Monterey Bay by 6pm March 14, 2019 and stay the duration of the event through 2pm March 16, 2019.

Agenda

Thursday
March 14 Arrive evening by 6 pm
Registration and Social

Friday
