

# Polar Profile: Dr. Megan Cimino

**Degree:** The University of Delaware Oceanography, Ph.D. 2016

**Location:**

Antarctica; Palmer Station

**Science:**

Megan studies birds that live in Antarctica including three species of penguins. Using a combination of remote sensing and data from the field Megan aims to better understand what affects these birds such as temperature and habitat change, predators and prey.

**Fun Facts:**

Megan is an energetic and determined person. She loves being outdoors and going on adventures.

**Important Tools:**

Time Depth Recorder, Autonomous underwater vehicles, satellites
